Welcome & Induction

DENT1060: Dental Practice IA

Course Coordinator: Dr Thomas Kim 2025

Contacting me

I am located in Level 7 of the Oral Health Centre. Accessing into this space requires prior notice to me.

Usual days of work

Wednesday, Thursday, Friday

Contact point

Thomas.kim@uq.edu.au

If at any stage, you have any concerns or matters you wish to discuss with me privately (outside of scheduled course hours), please email me and we can organise a time for discussion

What is dentistry (to you)?

What fields of dentistry are there?

There's also other fields in dentistry

- General dentistry!
- Research
- Public dentistry (working in hospitals)
- University positions
- Consultant positions (E.G. dento-legal consultant)

There are 13 dental specialties in Australia which are approved by the Australian Health Workforce Ministerial Council (the Ministerial Council). These specialties are:

- dento-maxillofacial radiology
- endodontics
- forensic odontology
- oral and maxillofacial surgery
- oral medicine
- oral and maxillofacial pathology
- oral surgery
- orthodontics
- paediatric dentistry
- periodontics
- prosthodontics
- public health dentistry (community dentistry), and
- special needs dentistry.

- My best advice to you is...
 - Be open minded and look into each of these fields and EXACTLY what skills/roles they require

How do you decide what you want to do?

- You can't!
 - You can try plan your future as best as possible, but this is 5years, and you need 2~5years of experience to actually know if you enjoy your work field
- My personal 2 cents
 - UQ generally hosts new/recent graduate dentist panel (usually for 3rd/4th/5th years)
 - Attending it can you give a very good and real perspective of how wide the Dental field is
 - Give “some” attention to your lecturers/supervisors journey through dentistry
 - There's various ways to reach where you want to be
 - There's also a recipe of success for many of these pathways

Learning to transition from High School/non-health degree to Dentistry

Whilst, yes, University will still provide marking criteria for assessments, guidelines for performance, etc...

- Dentistry has a strong expectation that you self-identify and nurture your growth
- UQ Dentistry staff are here to help provide guidance and perspective
- The faster you can come to appreciate this, the better you can thrive!

	High school	University
<i>Enrolling</i>	A parent enrolls a child in school. The parent is the primary point of contact. It is compulsory for a child to be enrolled at a school until they turn 16 years old.	You are responsible for enrolling in courses each semester. You are the primary point of contact. A student can choose to cancel their enrolment.
<i>Class timetables</i>	Fixed hours and days, usually Monday to Friday.	Students arrange their own timetables.
<i>Roll call</i>	Roll call happens every day. If a student misses class, a parent should contact the school to explain why.	Roll calls might be taken in tutorials, but they usually aren't taken in lectures. Classes may have different attendance policies.
<i>Non-attendance</i>	If a student misses a day or successive days without explanation, the school will contact a parent. A teacher might set "catch up" work.	If a student misses a class, they need to catch up on work in their own time. In cases of serious illness or extended absences, the student should consider withdrawing from the semester as soon as possible, or applying for extensions and deferred exams.
<i>Class sizes</i>	Usually about 30 students per class.	Lectures can be large, with hundreds of students, especially for first-year courses.
<i>Assessment</i>	A teacher will read drafts of essays or assignments and provide feedback. Constant supervision is given in the classroom. Some class time is usually dedicated to assessment.	Lecturers and tutors don't read drafts. A student is expected to work on assignments independently, usually outside of class. You can ask specific questions about drafts, but you won't be coached through assessment.
<i>Teachers vs academics</i>	Teachers remind students about important dates and deadlines, ensure homework is completed, and monitor a student's progress. Teachers also supervise classroom behaviour and may intervene as appropriate. Teachers have usually completed an education degree at university.	Students have to keep track of important dates and deadlines, and monitor their own progress. Students are treated as adults who understand appropriate behaviour. Lecturers are subject-matter experts who have usually completed a PhD in their area.
<i>Email and face-to-face communication</i>	Teachers are regularly available on email to answer school-related questions. Students can email about what they are learning or upcoming assessment. There are opportunities for one-on-one time with a teacher in the classroom.	Lecturers usually have set office hours for meeting with students or for answering emails. Students have to submit queries to the appropriate place (e.g. to their lecturer, the Student Centre, the relevant school office etc.)

DENT1060 course learning objectives

1. Understand effective communication techniques to facilitate person-centred dental practice.
2. Demonstrate an emerging critically reflective approach to dental practice.
3. Describe the anatomy of the primary and permanent dentition.
4. Manage and maintain a safe working environment, including principles of ergonomics.
5. Conduct and record a thorough patient interview to collect relevant medical, dental and social information.
6. Understand the ethical principles and legal responsibilities involved in the provision of person-centred dental practice.
7. Understand the principles of prevention of diseases in the oral cavity.

Course learning objectives and lecture learning objectives are different!

Week (commencing date)	Peer Clinic & Academic English (Wednesday)				Lecture/workshop (Thursday)		Pre-clinic (Friday)	
	9am – 12pm (OHC, Clinic 5.2)		10am – 12pm (OHC, Collaborative room 4313-16)		1pm – 3pm (OHC, Learning Theatre 4401)		9am – 12pm OR 1pm – 4pm (OHC Preclinical Lab 1)	
O-week (16/Feb/26)	Orientation Week							
Week 1 (23/Feb/26)	Induction lecture and equipment handout (12pm – 3pm @ Collaborative rooms 4313-16)				Intro to dental environment, patient interview, ergonomics		Pre-clinic orientation, ergonomics, instruments	1
Week 2 (2/Mar/26)	Infection control, ergonomics, intro to the patient	1	Effective health communication	2	Extraoral & intraoral exam, soft & hard deposits	Extraoral & intraoral examination, tooth morphology	2	
Week 3 (9/Mar/26)		2		1			Wax <u>carving</u> I	1
Week 4 (16/Mar/26)	Medical history, extraoral exam	1	Information gathering	2	Tooth morphology II, intro to virtual patients	Wax carving II	2	
Week 5 (23/Mar/26)		2		1			Tooth morphology III, Dental records & charting	Intro to <u>handscaling</u> and ultrasonics
Week 6 (30/Mar/26)	Intraoral exam, dental charting	1	Information giving	2	Tooth morphology quiz		Good Friday	
Mid- <u>sem</u> (6/Apr/26)	Midsemester break							
Week 7 (13/Apr/26)	Intraoral exam, dental charting	2	Information giving	1	Principles of prevention I	Dietary analysis, saliva testing, oral health products	2	
Week 8 (20/Apr/26)		1		2			Principles of prevention II	<u>Optragate</u> , fissure sealants
Week 9 (27/Apr/26) 27 ANZAC day	Saliva testing	1	Reflective practice	2	Principles of prevention III, intro to <u>perio</u> assessment	Perio record, prophylaxis	2	
Week 10 (4/May/26)		2		1			Intro to medical conditions	Assessment practice
Week 11 (11/May/26)	Session: 9am – 12pm			Intro to medical conditions		Assessment practice		2
Week 12 (18/May/26)	Plaque disclosing, PSR, prophylaxis	1	Keeping the patient informed	2	intro to gingiva health and disease	Pre-clinical skills assessment		
Week 13 (25/May/26)		2		1		ethical & legal responsibilities	Learn-a-prep I	1
Revision week (1/Jun/26)	Session: 9am – 12pm				Revision lecture		Learn-a-prep II	2
Exam week (8/Jun/26)	Session: 9am – 12pm				Revision		1	
Exam week (15/Jun/26)	Session: 9am – 12pm				Exam			

Understanding the schedule

Clinical coaching -> your lecture content

- Supplemented with online learning
- You are expected to do any recommended readings and pre-requisite learning prior to each lecture (lecture slides are available the week prior)

Pre-clinic -> simulation laboratory sessions

- You will be developing all modes of practical skills in these classes, and you can only see patients for the relevant skills once you pass the assessments linked to the noted skills

Peer-clinic -> simulation patient clinic sessions

- You will be learning to transfer your practical skills to real patients (role played by your colleagues)

English Academic Communication class -> no you are not learning how to speak English in this class

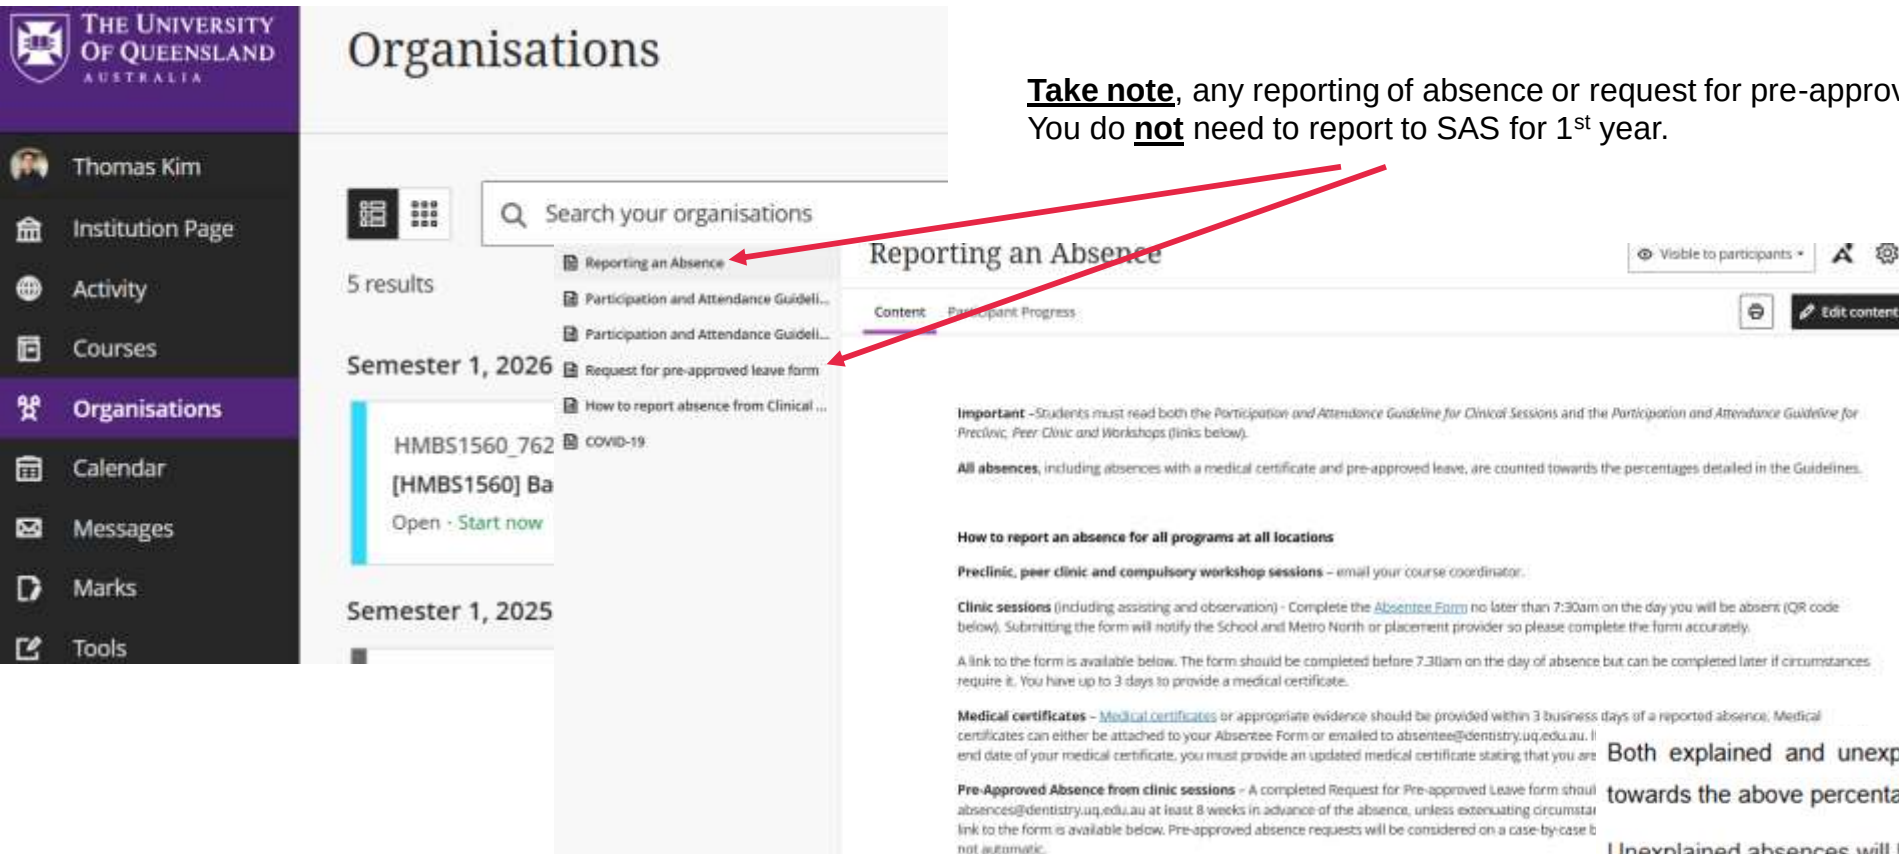

- Technical and health-related communication skills related to critical information collection, interpretation, and delivery

Attendance expectations:

The School of Dentistry attendance guideline details requirements for attendance:

- The Pre-clinical and Clinical Learning activities are designed to ensure that students receive the required level of patient exposure to achieve the Program Learning Outcomes.
 - 100% attendance is required over the semester
 - Concerns regarding absences from any Pre-clinical/Clinical Learning will be considered on a case-by-case basis as to whether the student meets the requirement to pass the course.
- Arriving late: Arriving more than 15 minutes late without a valid reason (i.e. unforeseen circumstances) will result in an absent on your record.

Absence and more information on Blackboard

Take note, any reporting of absence or request for pre-approval are directly to me at 1st year level. You do **not** need to report to SAS for 1st year.

Reporting an Absence

Visible to participants

Content Participant Progress

Important - Students must read both the *Participation and Attendance Guideline for Clinical Sessions* and the *Participation and Attendance Guideline for Preclinic, Peer Clinic and Workshops* (links below).

All absences, including absences with a medical certificate and pre-approved leave, are counted towards the percentages detailed in the Guidelines.

How to report an absence for all programs at all locations

Preclinic, peer clinic and compulsory workshop sessions - email your course coordinator.

Clinic sessions (including assisting and observation) - Complete the [Absentee Form](#) no later than 7:30am on the day you will be absent (QR code below). Submitting the form will notify the School and Metro North or placement provider so please complete the form accurately.

A link to the form is available below. The form should be completed before 7:30am on the day of absence but can be completed later if circumstances require it. You have up to 3 days to provide a medical certificate.

Medical certificates - [Medical certificates](#) or appropriate evidence should be provided within 3 business days of a reported absence. Medical certificates can either be attached to your Absentee Form or emailed to absentee@dentistry.uq.edu.au. If end date of your medical certificate, you must provide an updated medical certificate stating that you are

Pre-Approved Absence from clinic sessions - A completed Request for Pre-approved Leave form should be submitted to absentee@dentistry.uq.edu.au at least 8 weeks in advance of the absence, unless extenuating circumstances apply. A link to the form is available below. Pre-approved absence requests will be considered on a case-by-case basis and are not automatic.

Both explained and unexplained absences as well as pre-approved leave count towards the above percentages.

Unexplained absences will be dealt with under the ['Supporting Students' Fitness to Study Policy'](#).

Students are responsible for monitoring their participation and attendance and should contact the Course Coordinator if they have concerns.

Immunisation!

<https://my.uq.edu.au/information-and-services/manage-my-program/immunisation-and-disease-screening/student-immunisation-requirements/dentistry-medicine-midwifery-nursing>

- You can also search “UQ dentistry immunisation” to find the above weblink
- Ideally, you should have already actioned/begun action on this
- It is **your** responsibility to meet the expectations of immunisation
 - Barred entry to Peer clinic due to improper immunisation standard counts as an absence

What do I need to do?

1. Complete your immunisation evidence documentation

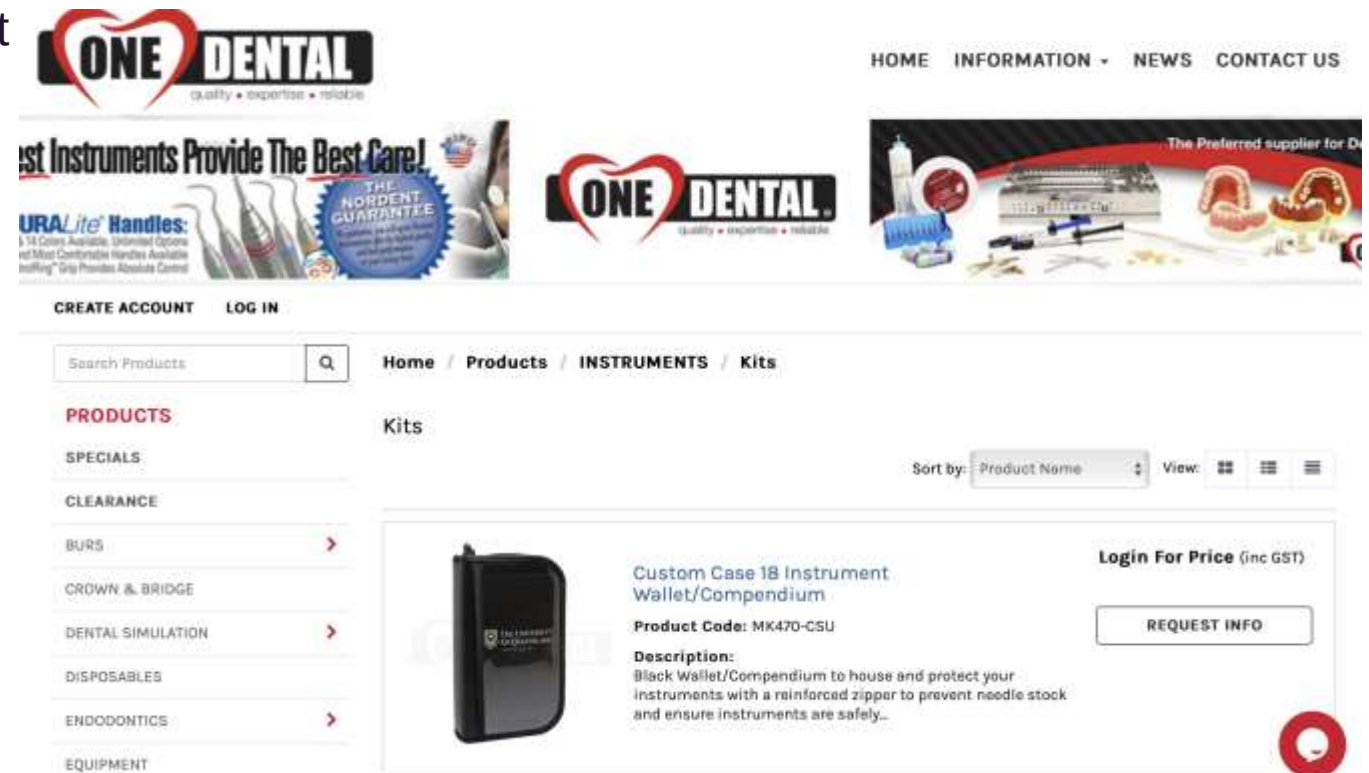

Start this process as soon as possible to avoid delays to your placements. It can take months and multiple visits to your doctor to complete your records and to be fully compliant for your placement.

- **Print a blank copy** of the [Student Immunisation Record Form B: Dentistry, Doctor of Medicine, Midwifery and Nursing Students \(PDF, 338.1 KB\)](#).
- **Take it to a registered general practitioner (GP)** for completion as soon as possible. Ensure you take your personal immunisation records to your appointment. It can take up to 7 months to complete this form if you have not had any hepatitis B vaccinations in the past.
- Ensure your GP has **completed the exposure prone procedures statement** in section 3 of your Student Immunisation Record form.
- **Complete pages 1-3 of the Tuberculosis Self-Assessment Form for Students (PDF, 515.6 KB)**. Note: See the [Tuberculosis \(TB\) Screening Information Sheet \(PDF, 386.4 KB\)](#) for further information. It can take up to 4 months to complete this requirement if latent TB testing is needed.

Equipment purchased for pre-clinic:

You should have picked up your equipment this morning!

- Anyone who is still waiting on their equipments do not fret as there is still time...
- You can find more equipment on the One Dental site

Please have a read through the Dentistry handbook!

Accessing Blackboard...

When accessing DENT1060, be sure these are selected

The screenshot shows the Blackboard interface for The University of Queensland. On the left is a navigation menu with the following items: Thomas Kim, Institution Page, Activity, **Courses** (highlighted with a red arrow), Organisations, Calendar, Messages, Marks, and Tools. The main content area is titled 'Courses' and includes a search bar, filters for 'Terms' (All terms) and 'Filters' (All courses), and a '25 items per page' selector. Below the search bar, it says '17 results'. The course list shows three entries, with the bottom one selected (indicated by a blue bar on the left). The selected course is 'DENT1060_7620_21612' for 'Semester 1, 2026', titled '[DENT1060] Dental Practice IA (Herston). Semester 1, 2026'. It is marked as 'Closed' and has links for 'Multiple Instructors' and 'More info'. A red arrow points from the text 'When accessing DENT1060, be sure these are selected' to the 'Courses' menu item and the selected course entry.

This folder contains assessment information and submission links.

Introduction

 Visible to students ▼

UQ Extend Course Content

 Visible to students ▼

Locker Keys:

Lockers and your locker keys will be assigned to you ASAP through SAS!

- So please be patient and work with us on it!

You will collect your keys from the SAS office when it's ready

- You will receive an email regarding this arrangement closer to the day of collection

Speaking from experience of losing the key 2 times...

- Please do not lose it!
- You cannot create a copy of the key, so you need to pay for replacement!

DENT1060 Peer & Pre - clinics

Be dressed appropriately
and/or professionally

- Shoes need to be fully **enclosed, non-porous, leather-type**
- Please wear your **name tag** at all times!
- Bring your safety glasses, equipment, workbook, and a pen

Also, you will be assigning yourselves to your own seats in Pre-clinic, and forming groups of 3 for Peer clinic!

- Some exceptions apply with seating arrangements, but this will be clarified on relevant days

Bare below the elbows

Things not allowed

- Watches (including smart watches)
- Fitness devices
- Rings (**some exceptions are allowed**)
- Nail polish/fake nails
- Excess/extra clothing material below the elbows

Having said that...

- Anything with medical/cultural/personal meaning, please discuss with me

Personal Protective Equipment (PPE)

- Stipulated PPE must be worn, or you will **NOT** be allowed to access the clinic.
 - This includes:
 - Impervious shoes
 - Comfortable, quality pair of safety glasses that comply with Australian standards: **AS/NZS 1337:2012 Personal eye protection**
- Standard prescription glasses are not safety compliant and need to be worn with face shield or over-spec safety glasses.

Incident reporting

One of the reasons why we ask you to take things seriously

- There is a lot of paperwork to fill out, but it is for your safety

What constitutes as an incident?

What: all incidents and near misses

- Occupational exposures -> sharps
- Safety incidents -> violent or inappropriate patient behaviour
- Patient incidents -> accidents involving the patient's safety
- Environment incident -> damage to property or equipment

Supervisor will guide you through

If a student is injured:

- Stop treatment of patient immediately.
- Obtain first aid treatment
- Report all sharp injuries or suspected sharps injuries to a Dental Assistant or Clinic
- Inform their supervisor and follow their advice for reporting and next steps as per clinic requirements (e.g. bloods)
- UQ [WHS Incident Form](#) must be completed via the [UQ Safe- Incident](#) database located on the UQ HSW website
- Report absence if necessary

Reminders

Requisite items will be due!

- Hand Hygiene Australia (HHA) module

Download the certificate of completion and upload to Blackboard

- Pre-clinic laboratory induction

Complete the quiz (it is not hard, so don't stress!)

- These must be complete by the DUE DATE, else you cannot enter the clinic environments!

They WILL fall under as absences and contribute to your absence tally

Year Representatives:

Role of Year Reps (1x male, 1x female):

- To serve as the student voice, for the good, the bad, but not the ugly, please.
 - The representatives liaise with me, as required.
 - Relaying information/updates on behalf of your class
 - To alert me if there are problems!!!
- This isn't supposed to take up much of your personal time

Don't forget, this does not mean that you can't approach me directly!

Thank you
