Clinical Practice Performance (Pre-Clinic & Peer Clinic)

Type: Portfolio (Pre-clinic/Peer clinic – Work Based Assessment)

Due Date: 29 May 2026 Weight: P/F - MUST PASS

Task Description:

Assessment of the pre-clinical and peer clinic practice performance will be by the Course Coordinator, in discussion with the peer clinic and pre-clinical supervisory team. This is based on student's performance and the quality of the critical self-reflections following each session, during the assessment period.

The assessment of Pre-Clinical Practice Performance is composed of the following components:

- 1) Daily sign off form completed for each pre-clinical or peer clinic session (AM and PM) with a reflection action plan
- 2) Mid-Semester Portfolio Review
- 3) End-Semester Portfolio Review

Each component **MUST** be approved (**PASS**) in order to **PASS** the Pre-clinical/Peer Clinic Practice Performance. The submitted portfolio must be **COMPLETE** in all the following respects:

- Students must complete the portfolio for all pre-clinical and peer clinic rostered sessions.
- The portfolio needs to remain on campus at all times and stored in the pre-clinic when not in use.
- When completing the record, students should complete the details in the form of pre-clinical or peer clinic task completed and/or treatment type including supervisor performance assessment and feedback.
- If supervisors have not provided written feedback, but have provided verbal feedback, students should record this feedback and request the supervisor to sign off on the statements. If there was no feedback either written or verbal provided, students must actively seek advice during the session and record as mentioned for verbal comments, followed by a sign off by the supervisor.
- Students must endeavour to improve professional pre-clinical and peer clinic practice, continuously.
- Students must ensure each daily sheet is signed off by their pre-clinical/peer clinic supervisor at the end of each session (AM/PM).
- Students must write and submit a short weekly reflection on their pre-clinical/peer clinic performance following the SEAL (Situation, Effect, Action, Learning) template provided.
- Portfolios can be audited randomly at any time by the course coordinator to verify authenticity of assessment and signatures of supervisors.
- Portfolios are not to be misused; this includes but is not limited to adjusting comments or scores. The portfolio record forms a part of the summative pre-clinical/peer clinic performance assessment and are the property of the UQ School of Dentistry. Such actions would constitute attempting to cheat on an assessment task. If it is believed that a student has interfered in any way with a portfolio logbook, disciplinary action for academic misconduct will be taken.
- Students must have all components of the portfolio completed and signed off by supervisors.
- This is a MUST PASS assessment item.
- If any of the above is not completed to a satisfactory standard, it will be deemed a fail grade for this assessment item.

Criteria and Marking:

* In accordance with PPL 3.10.02, supplementary assessment will **NOT** be available for Pre-Clinical/ Peer Clinic Practice Performance (portfolio) as professional competencies are developed over a 13-week practicum. There is no resubmission or resit option available for this assessment.

The practical pre-clinical/peer clinic portfolio will be reviewed and performance in each domain considered and used to complete a report of overall performance in each domain. Assessment of the portfolio will occur at two time points during semester, mid-semester and at the end of the semester, and the assessment will be done by the pre-clinical/peer clinic teaching team including the course coordinator. This is based on student's performance and the quality of the weekly critical self-reflections following each session/day, during the assessment period from the interim time point to the submission of this assessment task. Additionally, the effort made by the student to take on board the mid-semester review feedback will be considered while this report is being finalised.

Two domains will be assessed to **an expectations met (satisfactory), or expectations not met (unsatisfactory) standard** and mapped to the Professional competency requirements for the accreditation body for this program - The Australian Dental Council (Professional competencies of the newly qualified dental practitioner)

The domains being assessed are:

- Professionalism and Communication
- Pre-Clinical/Peer Clinic Treatment and Evaluation

To pass this assessment, students must achieve a pass on the FINAL end of semester pre-clinical portfolio review.

This is a **SUMMATIVE MUST PASS assessment** on pre-clinical performance progress at this stage.

To achieve a pass, the criteria are as follows:

- All domains are weighted equally, with peer-clinic and pre-clinic assessed separately. A **student must achieve a pass in each domain for both pre-clinic and peer clinic for an overall pass.**
- A pass in each domain will involve a student receiving 3 or less "expectations not met" (ENM) marks in Domain 1, and 3 or less "expectation not met" (ENM) marks in Domain 2.
- An overall pass for the report will involve a student receiving 6 or less "expectations not met" (ENM) marks across the 2 domains and not exceeding more than 3 "expectation not met" ENM marks in each domain.

There is an opportunity for feedback and improvement when the mid-semester portfolio review is provided to students, and students must reflect on this feedback provided to improve their pre-clinical and peer clinic performance in the latter part of the semester and use it to improve in areas identified as lacking or borderline. Both comments and grades must be considered while reflecting.

Submission Guidelines:

1. Interim assessment: Mid-semester portfolio will be submitted and reviewed mid-way through the semester (Week 6) and feedback provided. This is a formative assessment.

2. Final assessment: End-semester portfolio will be submitted and reviewed by the Course Coordinator at the end of the final week of the semester (Week 13). This is a summative assessment.

A COMPLETED portfolio must follow the criteria described above.

Attendance Mandate for Pre-clinic and Peer Clinic Sessions

All dental programs in the School of Dentistry at UQ are full-time and **100% attendance is required**. All learning activities are designed to ensure that students receive the required level of theoretical, preclinical and clinical exposure to achieve the Course and Program Learning Outcomes. The school requires **full attendance** of all coursework activities including pre-clinics and peer clinics.

Attendance will be tracked based on each course's requirements. An absence is defined as non-attendance for a day, session, or any part thereof, including late arrivals and early departures. If the absence threshold is exceeded for peer clinic/pre-clinic sessions ($\geq 90\%$ attendance required), this will result in a **fail** for the **summative pre-clinical practice performance assessment item**.

Pre-Clinical & Peer Clinic Practice Performance: Marking Criteria

Domain 1: Professionalism & Communication (ADC 1 & 2)	Unsatisfactory (ENM)	Satisfactory (EM)
Code of Conduct & Dress Code - Professional behaviour, including the ability to cooperate and communicate appropriately with staff and students. - Adheres to instructions provided by preclinic and peer clinic staff. - Complies with dress standards by wearing designated UQ scrubs, a lab coat, safety glasses, appropriate footwear and hair management. Feedback & Self-Reflection - A positive attitude toward learning and engages in critical self-reflection in response to constructive feedback. - Uses feedback to improve hand skills and competency. - Completes a written reflection for every rostered session. Preparedness, Engagement & Attendance - Preparedness for each pre-clinical or peer clinic session e.g. pre reading and brings correct instruments for the session. - Punctual attendance ≥90% attendance across the semester for rostered sessions in both the pre-clinic and peer clinic*. - Compliance with the absentee protocol by notifying the course coordinator via email prior to the session and provides appropriate documentation (e.g. a medical certificate).	- Demonstrates unprofessional behaviour or inappropriate communication with peers, and or staff. - Conduct may be disrespectful, disruptive, or not aligned with expected standards. - Dismisses UQ dress standards and needs to be prompted for correction. - Dismisses or resists feedback. Shows limited or no insight into performance. - Fails to recognise areas needing improvement or demonstrates defensive behaviour when challenged. - No evidence of reflection or adjustment and does not engage or demonstrate willingness to make changes. - Not prepared for the session with appropriate materials or does not participate actively. - Fails to arrive on time for rostered pre-clinical session. - Exceeds the permitted absence threshold* or does not adhere to absentee reporting protocol.	- Consistently demonstrates professional behaviour. - Communicates respectfully and clearly with peers, and pre-clinical or peer clinic supervisors. - Consistently complies with UQ dress standards. - Accepts and applies feedback constructively within the session. - Demonstrates insight into strengths and limitations. - Demonstrates the required changes as instructed for self-improvement in technical skills. - Arrives prepared for the session with appropriate materials and readiness to participate actively. - Arrives on time, meets pre-clinical attendance requirements ≥90%. - Adheres to the absentee reporting protocol.
Domain 2: Pre-Clinic/Peer Clinic Treatment & Evaluation (ADC 6.3)	Unsatisfactory (ENM)	Satisfactory (EM)
Infection Control & Safety - Wears correct Personal Protective Equipment appropriately. Preclinic -Maintains appropriate preclinic infection control – see attached preclinic infection control guidelines. Peer Clinic – Maintains scrupulous infection control practices, applying effective universal precautions. - Adheres to safety instructions e.g. model grinding, flames, sharps handling protocols. - Appropriate chair/station set up and clean up. - Maintains a safe and ordered working environment. Technical Skill & Execution - Correct ergonomics for specific task. - Correct usage of handpieces/instruments. - Hand eye motor skills are adequate for designated task. - Completes all designated tasks in a timely manner for the rostered session (time management) and seeks supervisor checks for each required stage.	- Does not wear correct personal protective equipment in peer clinic/ pre-clinic. - Fails to comply with appropriate infection control protocols. - Does not adhere to safety instructions and demonstrates unsafe or inappropriate practices. - Working environment is unhygienic/ unsafe and/or clean-up is unsatisfactory. - Working environment is disorganised, cluttered and potentially unsafe. - Ergonomics is inappropriate for task even after correction. - Inappropriate usage of handpieces or instruments causing potential risk to patients/fellow students. - Hand eye motor skills show little sign of improvement or are being applied inappropriately. - Avoids supervisor checks and runs over time and is unable to complete all the designated tasks for the session.	- Wears correct personal protective equipment in peer clinic and pre-clinic . - Consistently applies infection control and safety procedures in accordance with appropriate clinical and institutional protocols. - Follows all safety instructions. - Maintains a safe and hygienic clinical environment throughout the session. - Working environment is logically organised, uncluttered and safe. - Demonstrates appropriate ergonomics. - Delivers treatment safely and competently using appropriate hand motor skills techniques and appropriate handling of instruments. - Hand eye motor skills are at the required level for designated task or show improvement consistent with the learning environment at a satisfactory rate. - Seeks all supervisor checks, completes within the appropriate time and completes all designated tasks for the session.

*Exceeding the absence threshold will result in an **Unsatisfactory** grade for **Domain 1** in the **End-of-Semester Course Coordinator Portfolio Review**. As a **pass is required in each Domain**, an Unsatisfactory grade in Domain 1 will result in a **fail for the final pre-clinical practice performance assessment item**.
